NATIONAL INCOME

1937-1940

DOMINION-PROVINCIAL CONFERENCE
JANUARY 1941

662996

9. 8. 57

INTRODUCTION

The following statistics are a continuation of the estimates of the national income prepared for the Royal Commission on Dominion-Provincial Relations which were published in Appendix 4 to the Commission's Report. This booklet contains a revision of the estimates for 1937, estimates for 1938, 1939 and preliminary estimates for 1940. The methods employed in preparing these estimates were the same as those used in the study for the Commission and the statistics of income shown for each of the provinces for 1937-40 are comparable with those given for earlier years in Appendix 4. The source material and the bases of the estimates for both the 1930 to 1936 and 1937 to 1940 periods are described in detail in the explanatory notes included in Appendix 4.

The estimates were prepared under the direction of Mr. J. J. Deutsch, Assistant Secretary of the Committee on Dominion-Provincial Relations and Assistant to the Secretary of the Royal Commission on Dominion-Provincial Relations. The work was greatly facilitated by the information furnished by the various branches of the Dominion Bureau of Statistics, in particular the Agricultural Branch, whose estimates of the receipts from the sale of farm products were used to determine income from agriculture. The helpful co-operation of a number of private organizations who supplied information upon request is also gratefully acknowledged.

1939	2.8	0.1
1940(p)	2.6

(p) Preliminary

(A) For the constituents of this total classified by industries, see Tables I-A to XI-A.

(B) For the constituents of this total classified by the type of investments, see Tables I-B to X-B. The following, for which satisfactory information was not available, are not included: net rentals received by individuals from rented business property; corporate net income available for dividends but not paid out to shareholders; bond coupons or foreign dividend or interest cheques cashed abroad by Canadian residents; various sources of investment income from abroad other than bond interest and dividends; interest on deposits with banks, trust and loan companies.

(C) Net income of individual enterprisers (non-incorporated) for which it is not possible to distinguish between salaries and wages, interest on capital, profits and rent. Included in this group are farmers, fishermen, proprietors of independent merchandising establishments, lodging house keepers, persons in the professions not on salary but working on their own account, own accounts in construction and miscellaneous. For the net income of the individual enterprisers in the respective industries see Tables I-C to XI-C.

(D) Payments by the Dominion government received by residents of the province in respect of war pensions, old age pensions, direct and agricultural relief, less estimated contribution by residents of the province to the Dominion tax revenue required to meet these expenditures. For details see Tables I-D to X-D. For the method employed in estimating the contribution by each province to the Dominion tax revenue to meet these expenditures, see the explanatory notes in Appendix "4" (National Income) of the Report of the Royal Commission on Dominion-Provincial Relations.

(E) For details of receipts by crops, etc., details of income in kind and details of farm expenses, see Tables I-E to X-E.

(G) Expenditures on Education and Public Welfare from Municipal Revenues. Municipal taxes on real estate were included in Farm Operating Expenses (Tables I-E (3) to X-E (3)) and deducted from income from housing (Tables I-B to X-B). The services provided individuals (chiefly education and public welfare) which are paid out of such taxes are part of individuals' incomes and are therefore added into the totals (at cost).
